## PROJECTS

### Buffer Cache Simulation

JANUARY 2020 - MARCH 2020

Simulated the buffer cache and get the block algorithm as a python application, Project in the operating system, and by developing this project, I assimilate and learned about:

- Scenarios of retrieval of buffers.
- Structure of the buffer pool and buffer header
- Algorithms for reading and writing disk blocks.
- Working in a multiprocessing environment.

### PHP based Blog Posting Site

APRIL 2020 - MAY 2020

Developed and Deployed a blog posting site from scratch featured with blogging service, user authentication, weather report, news, and geolocation coordinate system that streams data over the globe and broadcast news in a more timely manner.

- Mysqli
- PHP and PHP Curl API
- PHPMailer Library
- Bootstrap
- JS and Rest API's
- RDBMS

### JSON Formatter & Convertor

June 2020 - July 2020

Constructed a JSON Formatter using (String manipulation and file handling techniques) CPP to help folks with debugging, formatting, and beautifying the JSON data so that it is easy to read and debug and used for further processes and can be converted into other formats as well.
