PROJECTS

<https://github.com/rohishakya/>

Buffer Cache and Get Block Simulation

JANUARY 2020 - MARCH 2020

This project was my first application in MSc in the operating system and by developing this project, I assimilate and learned about:

- Scenarios of retrieval of buffers.
- Structure of the buffer pool and buffer header.
- Algorithms for reading and writing disk blocks.
- Working in a multiprocessing environment of a computer application.

PHP based Blog Posting Site

APRIL 2020 - MAY 2020

Using PHP, JavaScript, Bootstrap, and Mysqli. Developed a blog posting site featured with user authentication, weather report, news, and geolocation coordinate system that streams temperature and humidity data over the globe and broadcast breaking news in a more timely manner. By building this project, I have learned about:

- Javascript API's
- PHP Curl API
- PHPMailer Library

JSON Formatter & Convertor

June 2020 - July 2020

Developed a JSON Formatter to help folks with debugging, formatting, and beautifying the JSON data so that it is easy to read and debug by human beings and used for further processes and can be converted in other formats too.
